Students Testimony:

Madelayne O.

A 9-year-old **Tech Creator**, bilingual and full of initiative in proposing ideas, stands out for actively participating in classes.

She has been a student at Club Ability since 2022, where she discovered her passion for programming, with her favorite course being Minecraft Education.

Additionally, she has served as a **volunteer** in various Club Ability activities. In recognition of her dedication, we are awarding her talent with a laptop.

Jancarlo H.

A 12-year-old **Tech Creator**, born in Utah, the child of Hispanic parents, is bilingual and a humble individual. Despite his young age, he has had the courage to seize the opportunities that have come his way.

Committed and passionate about science and technology, he has been a student at Club Ability since 2020, where he discovered his **passion for 3D Design**. In recognition of his dedication, we are rewarding his talent with a monitor, a laptop, and a tablet.

He participated in the USEF Utah Science Engineering Fair.

Ulvia G.

She acquired technological skills in our computer class, where she excelled and, at the same time, motivated more individuals with vision impairments to be part of our program.

She is a true **leader**, a **Tech Creator** born in Mexico. She also served as the tech speaker at our graduation ceremony, delivering words of hope to continue learning despite challenges. In recognition of his outstanding performance, we gifted him a laptop.

Ricardo Z.

He is a 61-year-old **Tech Creator**, born in Mexico. He acquired technological skills in our computer class, where he excelled notably. Despite his vision impairment, Ricardo decided to continue learning.

His story is remarkable, and together with him, we want to motivate more individuals with special needs to delve into the world of STEM. In recognition of his incredible **leadership**, we gifted him a laptop.
